COMPANY RESULTS

Far East Hospitality Trust (FEHT SP)

3Q23: Rising RevPAR And Profitability Driven By Surge In Visitor Arrivals

RevPAR increased 44% yoy and 14% qoq to S\$131 for its nine hotels. All hotels contributed variable rent, which accounted for 31% of master lease rental in 9M23. The incentive fee of S\$18m will be utilised to cushion the negative impact of higher interest rates. FEHT provides a 2024 distribution yield of 7.6%. Its P/NAV of 0.63x is unwarranted given its good corporate governance, strong sponsor and low aggregate leverage of 32.2%. Maintain BUY. Target price: S\$0.76.

3Q23 RESULTS

Year to 31 Dec (S\$m)	3Q23	yoy % chg	Remarks
Gross Revenue	30.2	+42.5	Hotels RevPAR: +44% yoy to S\$150 in 3Q23.
- Hotels	23.3	+56.3	Serviced Residences: RevPAR: +12% yoy to S\$239 in 3Q23.
- Serviced Residence	2.9	+14.4	On a same-store-basis, Serviced Residence and Commercial
- Commercial Premises	3.9	+6.5	Premises have grown 18.9% and 15.5% yoy respectively.
Net Property Income (NPI)	28.1	+42.4	
Distributable Income	22.9	+51.0	Indicative 3Q23 DPU is 1.12 S cents.

Source: FEHT, UOB Kay Hian

RESULTS

- Far East Hospitality Trust (FEHT) reported 3Q23 distributable income of S\$22.9m (+51% yoy), which is above our expectations due to higher RevPAR for both hotels and serviced residences.
- Hotels: Steep sequential recovery.** RevPAR for hotels increased 43.6% yoy to S\$150 in 3Q23, returning to pre-pandemic levels. Occupancy improved 10.6ppt yoy to 86.7% while average daily rate (ADR) increased 26.0% yoy to S\$173 driven by a recovery in visitor arrivals. Rendezvous Hotel Singapore and Village Hotel Albert Court, which were released from government contracts in mid-March, ramped up rapidly. One hotel remains under government contract. All hotels contributed variable rent, which accounted for 31% of master lease rental in 9M23. Revenue for hotels increased 56.3% yoy (Elizabeth Hotel was undergoing renovation in 3Q22).
- Serviced residences: Steady and consistent contributor.** RevPAR for serviced residences increased 12.2% yoy to S\$239 in 3Q23, which is 31% above pre-pandemic levels. The resilient performance was driven by a 14.4% yoy growth in ADR. FEHT continues to benefit from new bookings secured at higher rates. On a same-store basis, revenue for serviced residences increased 18.9% yoy if we exclude contributions from Village Residence Clark Quay (divestment completed on 24 Mar 22).

ANALYST(S)

Jonathan Koh, CFA, MSc Econ
+65 6590 6620
jonathankoh@uobkayhian.com

- Collected additional incentive fee of S\$18m.** FEHT has received additional payment of S\$18m from the divestment of Central Square in 2Q23 after the buyer obtained provisional permission for redevelopment from the Urban Redevelopment Authority. Management intends to utilise the incentive fee of S\$18m received in Mar 23 to cushion the negative impact from higher interest rates.
- Working on early refinancing.** Aggregate leverage remained low at 32.2% as of Sep 23. Average cost of debt was unchanged at 3.2%. Interest coverage ratio is healthy at 3.7x. FEHT is in the advanced stage of negotiation to refinance borrowings of S\$125m that mature in 2024 (17% of total borrowings). Management expects average cost of debt to hit 3.5% by end-23.

STOCK IMPACT

- Benefitting from rising visitor arrivals.** Visitor arrivals increased 44.6% yoy to 1.1m in Sep 23, representing 77% of pre-pandemic levels. Chinese tourists grew 9x yoy to 135,677 in Sep 23, reaching 55% of pre-pandemic levels. China has regained its stature as the largest source market for Singapore in 3Q23. There is room for further recovery as Chinese tourists accounted for a smaller 9.9% of total visitor arrivals during 9M23 compared with 19.0% in 2019. The volume of Chinese guests is expected to increase during the National Day Golden Week in Oct 23, which coincides with the Mid-Autumn Festival.
- Exploring expansion overseas.** FEHT intends to diversify into gateway cities in developed markets. It is scouting for opportunities to invest in limited-service, midscale and upscale hotels, where yields are higher. Potential acquisitions are likely to be fully debt funded. Management aims for a balanced mix of 80:20 between properties in Singapore and overseas over the longer term.
- Trading at steep 37% discount against NAV.** FEHT trades at a P/B of 0.63x, the lowest in our universe of hospitality REITs. The discount is unwarranted given FEHT's good corporate governance, a strong sponsor in Far East Organization (FEO), and low aggregate leverage of 32.2% as of Sep 23.

EARNINGS REVISION/RISK

- We raise our DPU forecasts by 9% 2023 and by 8% for 2024 after factoring in the strong 3Q23 results and additional capital distribution of S\$0.5m in 2H23 and S\$3.0m in 2024.

VALUATION/RECOMMENDATION

- Maintain BUY.** Our target price of S\$0.76 is based on DDM (cost of equity: 7.75%, terminal growth: 2.8%).

SHARE PRICE CATALYST

- Downside protection from fixed rents embedded in its master leases with sponsor FEO, which owns 61% of FEHT.
- Recovery in occupancy, ADR and RevPAR in 2023 and 2024.
- Acquiring the remaining 70% stake of three Sentosa hotels from sponsor FEO.

TRADERS' CORNER

Singapore Tech Engineering (STE SP)

Trading Sell range: S\$3.77-3.78
 Last price: S\$3.76
 Target price: S\$3.54
 Protective stop: S\$3.88

The price could have formed a possible price top at S\$3.98. There is a falling window that was formed on 19 October, hinting at more downside ahead. A bearish conversion and base lines crossover is likely. The MACD has turned bearish. These could increase chances of the stock price moving lower.

We see increasing odds of stock price testing S\$3.54. Stops could be placed at S\$3.88.

Approximate timeframe on average: 1-2 weeks (initiate this trade idea if the stock hits the entry price range within three trading days)

Our institutional research has a fundamental BUY and target price of S\$4.20.

Sembcorp Industries (SCI SP)

Trading Sell range: S\$4.60-4.61
 Last price: S\$4.59
 Target price: S\$4.22
 Protective stop: S\$4.77

The price is trading below the cloud, keeping the downtrend intact. Conversion and base lines remain in a bearish crossover. The MACD is very bearish and is moving lower. These could increase chances of the stock price moving lower.

We see increasing odds of stock price testing S\$4.22. Stops could be placed at S\$4.77.

Approximate timeframe on average: 1-2 weeks (initiate this trade idea if the stock hits the entry price range within three trading days)

Our institutional research has a fundamental BUY and target price of S\$7.20.
