FROM THE REGIONAL MORNING NOTES...

Mapletree Pan Asia Commercial Trust (MPACT SP)

A Tale Of Two Malls

VivoCity and Festival Walk are MPACT's core retail assets. While VivoCity has benefitted from the return of tourists, Festival Walk has not. Office/business park properties in Singapore, such as MBC, mTower and Mapletree Anson, were resilient but management cautioned weaknesses overseas in Shanghai, China, and Chiba, Japan. MPACT provides stability from geographical diversification. It trades at FY25 distribution yield of 6.3% and P/NAV of 0.79x. Maintain BUY. Target price: S\$1.68.

WHAT'S NEW

- VivoCity: Gaining from strength to strength with continual enhancements.** VivoCity saw a pick-up in rental reversion to +14.2% in 2QFY24 (1QFY24: +12.3%). Occupancy has also edged higher by 0.7ppt qoq to 100%. VivoCity is the gateway to Sentosa and shopper traffic has increased 14.4% yoy, supported by the return of tourists, which accounted for 25% of pre-pandemic footfall. Tenant sales increased 4.3% yoy in 2QFY24 and was 13% above pre-pandemic levels. Tenant retention is healthy at 81.4%. Mapletree Pan Asia Commercial Trust (MPACT) has completed reconfiguration for 80,000sf of retail space at VivoCity's level 1, including a new 56,000sf retail zone with an enhanced beauty and fragrance cluster and a rejuvenated TANGS store, in May 23. It has initiated reconfiguration of the food & beverage cluster at level 1 from three to four units, and added an indoor refreshment area. This latest enhancement is expected to be completed by Dec 23.
- Festival Walk: Muted recovery.** Festival Walk continues to incur negative rental reversion at -9.5% (1HFY23: -11.5%) and tenant retention is sub-optimal at 57.5% in 1HFY24. Festival Walk was able to attract new tenants to maintain full occupancy at 100%. Operating performance has moderated in 2QFY24 due to typhoon Haikui that ravaged Hong Kong in Sep 23. Shopper traffic dipped 1.4% yoy (1QFY24: +18% yoy). Similarly, growth in tenant sales also slowed to +3.7% yoy (1QFY24: +12.1% yoy). Festival Walk has not benefitted as much from the return of mainland tourists as it is oriented toward domestic consumers. Recovery has also been curtailed as Hongkongers are increasingly shopping across the border at Shenzhen, especially during weekends. Management will optimise retail mix at Festival Walk to align with local preferences.
- Google staying put at MBC.** Mapletree Business City (MBC) provided positive rental reversion of +7.1% in 1HFY24 and committed occupancy improved 0.9ppt qoq to 96.8% after backfilling space vacated by Unilever in 2QFY24. Google Asia Pacific has renewed the majority of its leases and remains MPACT's largest tenant, accounting for 5.9% of gross rental income. 34-storey Labrador Tower with NLA of 696,800sf, located across Pasir Panjang Road, is scheduled for completion in 2Q24. Its anchor tenants are SP Group and Prudential Singapore. Labrador Tower's asking rent is higher at S\$7.50psf. Thus, it does not compete directly with MBC, which charges about S\$6.50psf.

- Stable contributions from Japan portfolio.** According to CBRE, landlords of existing buildings offered affordable rents to retain tenants, leading to vacancies being concentrated at newly completed buildings. Rents for Tokyo were stable at ¥21,270/tsubo. Occupancy for its nine Japan properties remains healthy at 97.3%. Management will step up leasing efforts to address weakness for its three office properties in Chiba, namely mBay Point, Fujitsu Makuhari and SII Makuhari. Contribution from Japan is curtailed by the Japanese yen depreciating 7.1% yoy against the Singapore dollar.
- Gateway Plaza in Beijing de-risked.** Vacancy for Beijing office surged 3.1ppt yoy to 21.2% in 3Q23 due to the completion of six office buildings, which added a massive 462,000sqm of new office space. Average office rent in Beijing fell 3.5% yoy to Rmb296psm as landlords lowered rents to attract cost-sensitive tenants. Leasing activities are dominated by relocations as companies reduce costs through consolidation and downsizing. Fortunately, MPACT has de-risked Gateway Plaza after anchor tenant BMW, MPACT's second largest tenant, renewed for five years till 2028 in 3QFY23.
- Potential weakness for Sandhill Plaza in Shanghai.** Supply of business park space has exceeded demand for four consecutive quarters since 4Q22. Vacancy rose 3.2ppt yoy to 18.5% in 3Q23. Average rents for business parks in Shanghai were nevertheless stable at Rmb139psm. Zhangjiang Science City, where Sandhill Plaza is located, suffered large-scale terminations in 1H23. Sizeable new business park space of 420,000sqm will come on-stream in Shanghai over the next six months. Management cautioned weakness for Sandhill Plaza due to lacklustre demand and non-renewals.
- Coping with higher cost of debt.** Aggregate leverage was stable at 40.7% as of end-Sep 23. Finance expenses increased 37.7% yoy to S\$58.2m in 2QFY24 due to elevated interest rates for both Singapore and Hong Kong dollars. Cost of debt crept up by 0.17ppt qoq to 3.34% in 2QFY24. Interest rates for 80% of its total borrowings are hedged or fixed. MPACT has shifted from Hong Kong dollar-denominated loans to offshore renminbi loans to enhance risk management. Management guided that cost of debt will increase to 3.5% for FY24 as older fixed rate debt and interest rate swaps progressively mature.

STOCK IMPACT

- Headwinds from overseas properties.** MPACT benefits from resilient growth in Singapore but overseas contributions are affected by a strong Singapore dollar. VivoCity continues to provide resilient growth but the recovery from Festival Walk has been slower than anticipated. There is weakness from China properties where occupancy dropped 3.6ppt yoy to 88.9% in 2QFY24 and rental reversion was negative 3.5% in 1HFY24.

EARNINGS REVISION/RISK

- We cut our FY25 DPU by 6.6% due to lower contributions from China and further depreciation of CNY and JPY of 4% and 10% yoy respectively against the SGD.
- We estimate revaluation losses of S\$204m from MPACT's China properties at end-FY24, assuming: a) cap rate expansion of 25bp, b) occupancy further declining to 85% (2QFY24: 88.9%), and c) CNY depreciating 4% against SGD. We expect the lower portfolio valuation to cause aggregate leverage to increase by 1.0ppt to 41.7%.

VALUATION/RECOMMENDATION

- Maintain BUY.** Our target price of S\$1.68 is based on DDM (cost of equity: 7.25%, terminal growth: 2.2%).

SHARE PRICE CATALYST

- Resilient growth from VivoCity and MBC in Singapore.
- MPACT has four properties located in the HarbourFront area, which accounted for 49% of its portfolio valuation. It will benefit from the development of Greater Southern Waterfront and rejuvenation of Sentosa Island and Pulau Brani.
